Ceiling plenum box – vertical

VPE125-2, VPE160-2/90

The AWENTA PRO VPE ceiling plenum box (vertical) is an ultra-lightweight solution for use between a suspended ceiling, a ceiling or wall, and in other confined space locations. The box allows for connecting a maximum of two Ø75 - Ø90 mm ventilation ducts to a supply or exhaust air valve.

AWENTA PRO plenum boxes are made of durable modified polypropylene material. The robust structure guarantees failure-free operation for many years and thanks to the use of bacteriostatic additive the product has obtained 99.99% bacteriostatic activity. The design of the plenum box allows it to be mounted on different surfaces and in different planes.

The Ø75 - Ø90 mm female connectors are equipped with a gasket and special protection of the connected ducts, which ensures the tightness of the entire system in the high ATC1 class.

It is possible to install them on floor / wall / ceiling: made of concrete or plasterboard.
